Tom,

I received your email in reference to the 148 N. Main Street project hold harmless agreement and final site plan approval. We still have not received revised plans reflecting the changes to the storm water treatment system and revised grading. I have spoken to the Engineer for this project and have requested the revised plans. He indicated to me that he will finalize plans and send them over for a final check and approval. Once we receive all the required information we can provide an approval letter as one package to the Village. If you have any questions feel free to call either myself or Tom Biehl.

Regards,

John Cecil  
Senior Project Engineer

My client will sign and deliver the Hold Harmless Agreement which you indicated was now acceptable to the City.

As you will recall this was to be given for the City's and HRC's approval of the storm water system.

Although there are other aspects yet to be approved, it makes no sense for us to go forward without having HRC's written confirmation that the storm water system as we have proposed is approved.

I understand that it will be specifically conditioned upon us delivering the Hold Harmless agreement.

Please provide me with that written approval as soon as possible. I will have the Hold Harmless signed and ready to exchange when that written approval is ready to be delivered.

Neil Wallace
